HR MANAGER,
Christian Health Association of Kenya (CHAK),
Nairobi, Kenya

Dear Hiring Manager,

I am writing to express my interest in the Assistant Software Developer position at the Christian Health Association of Kenya (CHAK). I am a motivated and detail-oriented software developer with over two years of hands-on experience in developing, supporting, and maintaining web and digital systems in production environments. I am particularly drawn to CHAK's mission of strengthening health systems and delivering quality, non-profit healthcare services through innovation.

I hold a background in Information Technology / Computer Science and have strong working experience with **JavaScript and modern frameworks such as React**, as well as **PHP with Laravel** for backend development. I have participated in the development and enhancement of web-based systems, supported deployments, and assisted users through training and documentation—experience that closely aligns with the responsibilities of this role.

In addition, I have practical exposure to **mobile application development using React Native**, database management with **MySQL and PostgreSQL**, and familiarity with **MongoDB**. I am comfortable working with **Git for version control**, using **Docker for containerization**, and collaborating in environments that apply modern DevOps practices. I also have experience troubleshooting, debugging, and optimizing systems to ensure reliability and performance.

What excites me most about this opportunity is the chance to contribute to **health information systems such as CHMIS**, supporting platforms that directly impact healthcare delivery across communities. I am eager to learn from senior developers, contribute to research and development initiatives, and grow professionally while adding value to CHAK's CBSL–HIS Department.

I am a strong team player with good communication skills, a willingness to learn, and a genuine passion for using technology to solve real-world problems. I would be honored to contribute my skills and commitment to CHAK's mission.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and enthusiasm can support CHAK's digital health initiatives.

Sincerely,

Daniel Mungai
