Key Highlights

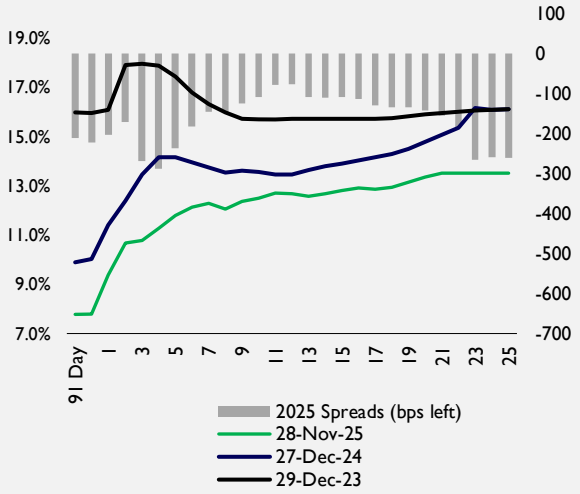

- **Spot market treasury bills were undersubscribed, recording a subscription rate of 22.5% from 67.3% recorded the previous week. Absolute demand was skewed towards the 91-day paper – which received bids amounting to KES 2.41 Bn** against KES 4.00Bn offered, underscoring preference for liquidity amid prevailing market conditions. The 364-day paper recorded moderate demand, receiving KES 2.28Bn against KES 10.00Bn offered, while the 182-day tenor continued to underperform, attracting only KES 0.71Bn against KES 10.00Bn on offer. We anticipate a moderation in market participation as investors shift focus to the festive period.
- The government is looking to raise KES 60.00Bn through the re-opening of the FXD1/2019/020 and FXD1/2022/025 bonds, which are earmarked for budgetary support in FY25/26. The bonds have a quoted tenor to maturity of 13.2 yrs and 21.8 yrs while the coupon rates are set at 12.8730% and 14.1880% respectively. Bidding is set to close on 7th January 2026. Additionally, the National Treasury announced a switch auction from FXD1/2016/010 (0.6 years to maturity, coupon 15.039%) to the re-opened FXD1/2022/015 (11.3 years to maturity, coupon 13.942%), as part of its strategy to smooth the debt maturity profile and manage refinancing risk. We will be issuing further bidding guidance.
- The 91-day Treasury Bill rate witnessed a 4.68bps w/w downtick to 7.73%. Meanwhile, the accepted average yields on the 182-day paper stagnated at 7.80%, whilst the 364-day paper declined by 1.78 bps. Looking ahead, we expect yields to continue trending downwards in the near term, however, now at a slower pace.
- **Across the secondary bond market, the value of bonds traded decreased 60.9% w/w to KES 27.07 Bn** from **KES 69.26 Bn** recorded a week prior. The NSE Bond Index witnessed an increase of 25.34 bps w/w to 1167.13 points, driven largely by a decrease in the 11-year benchmark yields. The 12-year yield rose the most by 31.00 bps w/w while the 11-year yield eased the most by 65.85 bps w/w.
- **Yields on Kenya's Eurobond papers decreased by an average of 8.34 bps w/w.** The table below shows the performance of the Eurobond papers.

Table 1: Indicative Fixed Income Stats

Rate	Current	Previous	w/w bps change	2025 bps change

Macroeconomic Developments

Exchange Rate

- The Kenya Shilling depreciated against the USD, closing the week at KES 129.00 from 128.95 the previous week, reflecting a marginal w/w depreciation of 0.03%. The Shilling's YTD appreciation against the USD stood at **0.2%.**
- Official forex reserves increased by **0.3% w/w** to **USD 12,168 Mn** from **USD 12,133 Mn**. The current reserves now offer about **5.3 months** of import cover, meeting the CBK's statutory requirement of 4 months. The reserves also met the EAC's convergence requirement of 4.5 months of import cover.

December 2025 Inflation

- Inflation data for December is due this week, and we project headline inflation to ease slightly to within the 4.4%–4.7% range. This outlook is underpinned by stable energy prices and improved food supply conditions following recent harvests. Nonetheless, the accommodative monetary environment is expected to gradually increase liquidity, presenting mild upside risks to inflation over the medium term.

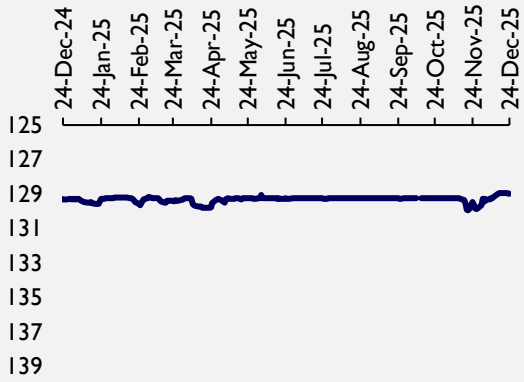

EPRA Pump Price Review- December 2025

- The Energy and Petroleum Regulatory Authority (EPRA) has released the maximum retail pump prices for the December-January cycle, maintaining price stability for the fourth consecutive month. Super Petrol, Diesel, and Kerosene prices will remain unchanged, with motorists in Nairobi continuing to pay KES 184.52 per litre for Super Petrol, KES 171.47 per litre for Diesel, and KES 154.78 per litre for Kerosene.
- EPRA noted that the average landed cost of Super Petrol declined slightly by 4.3% to USD 619.14 per cubic metre in November 2025. In contrast, the landed cost of Diesel and Kerosene rose by 3.02% and 5.52% to USD 654.24 and USD 667.05 per cubic metre, respectively. Albeit the upward pressure from higher Diesel and Kerosene import costs, domestic retail prices were kept steady, supported by a relatively stable exchange rate and the prevailing tax structure.
- Going forward, in the near term, we expect fuel prices to remain stable, supported by a stable currency. The sustained stability in pump prices is likely to help contain cost-push inflation pressures and support inflation remaining within the CBK's target range. However, potential shocks from global supply disruptions and heightened geopolitical risks remain key uncertainties going forward.

Liquidity

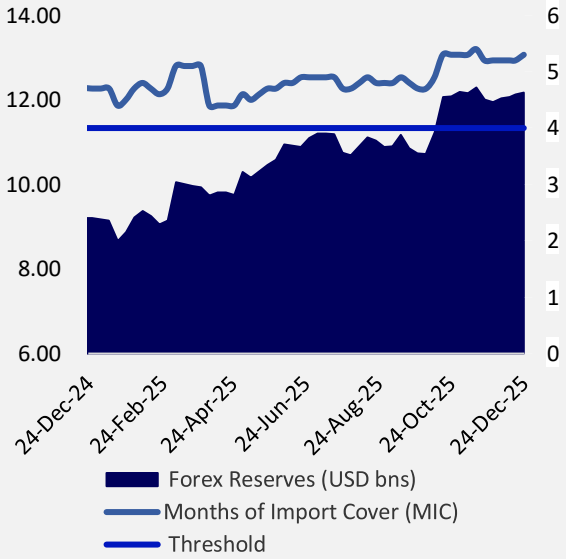

- Liquidity conditions across the money market tightened as evidenced by the 2.9 bps increase in average interbank rate to 9.0%
