Existing shareholders will receive the proposed special dividend from the sale of Hima Cement, which will not be paid to Savannah Clinker Limited upon declaration.
- **Housing Finance Rights Issue –** ***HF Group PLC announced that its Board of Directors has approved a proposed rights issue to offer up to 1,499,995,255 new ordinary shares, each with a par value of KES 5.00.*** This offer, which includes a 30% green shoe option, will be available to shareholders on record at the book closure date, allowing them to acquire up to three new shares for every share held. The rights issue is pending approval from the shareholders, the Capital Markets Authority, the Nairobi Securities Exchange, and a "No Objection" from the Central Bank of Kenya.
- **Centum Investment Plc Share Buyback Extension-** ***Centum has extended its share buyback program beyond the initial 2nd August 2024 deadline to its next Annual General Meeting, tentatively scheduled for 20th September 2024.*** This extension, approved by the Capital Markets Authority, maintains the original terms, including a maximum purchase price of KES 9.03 per share.
- **Earnings Season –** ***HY'2024 earnings releases across banking, insurance, and other sectors unveiled a diverse financial landscape.*** Results varied significantly across industries, underscoring the impact of challenging market conditions on performance.
- **Moderate Price Pressures –** ***Latest statistics from the Kenya National Bureau of Statistics (KNBS) indicate that the headline inflation rate as measured by the consumer price index (CPI) accelerated mildly to 4.4% in August 2024 from 4.3% in July 2024.*** Fuel inflation accelerated 20bps to 4.7% from 4.5% in July 2024 while food inflation decelerated by 30bps to 5.3% in July 2024. Core inflation (Non-Food-Non-Fuel) tightened marginally to 3.5% over the period under review.
- **Kenyan Shilling Resilient -** ***The Kenya shilling appreciated marginally against the USD to close at KES 129.17 versus KES 129.92 at the end of July 2024.*** We expect sustained stationarity of the Kenya shilling - owing to narrowing current account balance. We further expect portfolio dollar inflows and a recovery in Kenya's key exports to support a stable shilling. However, rising external debt-service commitments poses downside risks for the shilling.
