AIB-AXYS December 2024 Stock Recommendations

November 2024 Highlights

- **Sanlam Kenya Plc Rights Issue -** ***Sanlam Kenya Plc announced a proposed Rights Issue aimed at raising up to KES 3.25 Bn, pending approval from shareholders and the Capital Markets Authority (CMA).*** The primary goal of this Rights Issue is to improve the Group's financial health by reducing long-term debt, which will lower interest expenses, and provide management with greater financial flexibility to drive growth and enhance profitability. The company will release an information memorandum detailing the terms and conditions of the Rights Issue once it receives approval from the CMA.

- **Earnings Season –** ***The banking sector, Safaricom, Kapchorua Tea, Williamson Tea, E.A Portland released their net earnings during the month reflecting a mixed performance amid a challenging macroeconomic environment.*** The banking sector delivered robust growth in net earnings, primarily driven by a notable increase in net interest income. Safaricom experienced a decline in net earnings, attributed to the impact of foreign exchange reforms in Ethiopia. Kapchorua Tea and Williamson Tea reported weaker results, as persistent oversupply in the global tea market continued to weigh on demand and prices. E.A Portland cement notably returned to profitability, leveraging fair value gains on investment properties.

- **Stable Price Pressures –** ***Latest statistics from the Kenya National Bureau of Statistics (KNBS) indicate that the headline inflation rate as measured by the consumer price index (CPI) marginally accelerated to 2.8% in November 2024 from 2.7% in October 2024.*** Fuel inflation decreased 10bps to 1.6% from 1.7% in October 2024. Food inflation increased 20bps to 4.5% from 4.3% in the preceding month. Core inflation (Non-Food-Non-Fuel) eased marginally by 10 bps to 3.2% over the period under review.

- **Kenyan Shilling Resilient -** ***The Kenya shilling depreciated slightly against the USD to close at KES 129.6754 versus KES 129.1999 at the end of October 2024.*** We anticipate sustained stability of the shilling, underpinned by an improving current account balance, expected portfolio dollar inflows, and a projected recovery in key export sectors. However, the currency faces potential downside risks from increasing external debt-service obligations, which may exert pressure on foreign exchange reserves and overall currency performance in the medium term.

What does December 2024 Hold?

- **December MPC Meeting –** The next meeting of the Monetary Policy Committee (MPC) is scheduled for 5th December 2024. We anticipate a reduction in the Central Bank Rate (CBR) driven by easing inflationary pressures and stabilization of the Kenyan Shilling.
