# AIB-AXYS April 2026 Stock Recommendations

## March 2026 Highlights

- **Storm over paradise –** In our 2026 Investment Outlook, we introduced the global growth outlook with the statement: *"2025 was far from business as usual, and investors should brace for potential disruptions in 2026."* Events in March echoed this sentiment, presenting a sense of déjà vu following a US-Israel joint attack on Iran, bringing to an end a sustained bull run. When viewed alongside the timing of the Middle East conflict and the sweeping tariffs declared last year, market losses driven by heightened investor concerns were more pronounced, with equities declining by 9.8% in March compared to 3.4% in April last year. Investors moved to liquidate positions in search of safety, driving prices lower across the market. Both regional and global equity markets moved in tandem, with broad-based sell-offs observed. In this environment, we reiterate our recommendation to focus on quality counters with strong fundamentals as a key portfolio strategy to navigate heightened volatility. Additionally, the pullback in key blue-chip stocks within our market presents an opportunity for investors to increase exposure at more attractive valuations. At the time of writing, markets are experiencing a brief reprieve following the ceasefire between the conflicting parties. However, the outlook remains uncertain. Markets are already pricing in potential inflationary pressures, which may necessitate a reassessment of monetary policy. Notably, the Central Bank held rates unchanged in this week's meeting for the first time since August 2024. A prolonged conflict could weigh on economic growth and, in turn, dampen corporate profitability.
- **Banking sector earnings season –** Listed banks released their full-year earnings alongside other corporates. Most players reported growth in earnings, with a majority recording double-digit increase. The growth in earnings was accompanied by a notable increase in dividend payouts, a key consideration for Kenyan investors. Only Stanchart reported a decline in earnings, which was followed by a reduction in dividends. Equity Group stood out, recording a net profit of KES 75.55 Bn, a 54.7% increase on a yearly basis. Growth was supported by both funded and non-funded income streams. Across most banks, we noted that they capitalized on the low-interest-rate environment, pushing down the cost of funds and preserving margins, alongside a commendable improvement in asset quality.
- Insurance companies recorded mixed performance; prior to the release of earnings, the year had proven challenging, with most underwriters citing heightened claims that weighed on margins
- **Proposed Indirect Acquisition of 54.08% Stake in Nation Media Group Plc by Taarifa Ltd from Aga Khan Fund for Economic Development S.A.–** The notice of the transaction indicated that Taarifa and Aga Khan Fund for Economic Development (AKFED) had entered into a Share Purchase Agreement (SPA) for the acquisition of 100.0% of NPRT Holdings Africa Limited from AKFED. NPRT is wholly and beneficially owned by AKFED. NPRT holds 92,618,177 ordinary shares in NMG, implying that, by acquiring 100.0% of NPRT, Taarifa will indirectly acquire a 54.08% stake in NMG's issued share capital. It is important to note that Taarifa does not intend to make a takeover offer for the remaining shares of NMG.
- **Britam Holdings Plc – Proposed Reduction of Share Premium**: The insurer announced plans to reduce share premium by KES 5.88 Bn, to KES 7.36 Bn from KES 13.24 Bn. The amount is intended to be deployed to offset the company's accumulated losses, which would now give the company leeway to pay dividends.

The group balance sheet grew 19.0% to KES 541.25Bn, supported by 24.4% loan growth and aggressive rotation into government securities.
