AIB-AXYS Weekly Fixed Income Note

20th April 2026

Key Highlights

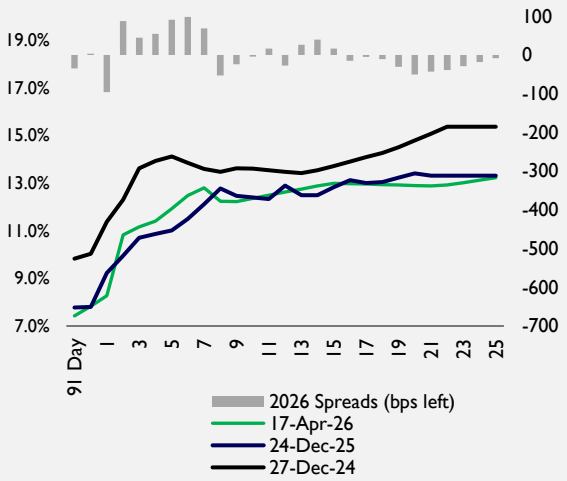

- **Spot market Treasury bills recorded a sharp undersubscription, with the overall subscription rate declining to 58.3% from 102.3% recorded the previous week,** signaling a pronounced deterioration in investor demand. The weakness was broad-based across all tenors, with even the traditionally resilient 182-day paper attracting only KES 7.67Bn against KES 10.00Bn offered. The 91-day and 364-day papers followed with subdued bids of KES 2.58Bn and KES 3.75Bn, respectively, underscoring a clear retreat from both liquidity-driven and yield-seeking positions. The magnitude of the undersubscription points to a tightening liquidity environment and a deliberate pullback by investors likely reflecting a combination of heightened global uncertainty and emerging currency pressures.
- The 91-day Treasury bill rate edged up to 7.42%. Similarly, yields on the 182-day paper recorded a marginal uptick of 0.02 bps, while the 364-day paper increased by 0.23 bps to 8.27%.
- **In the results from the reopened SDB1/2011/030 and FXD1/2026/030(new issuance) the government registered a performance rate of 191.66%** with total bids received amounting to KES 38.33 Bn against a target of KES 20.00 Bn. The total amount of accepted bids was KES 30.06 Bn. The weighted average rate of accepted bids for SDB1/2011/030 and FXD1/2026/030 was 12.9960% and 13.7554% respectively (well in line with our competitive bidding range recommendation) while the coupon rates for the bonds were 12.0000% and 12.5000%, respectively.
- **In the results from the switch auction of FXD1/2018/015, the government registered a subdued performance rate of 12.80%**, with total bids received amounting to KES 2.56Bn against a target of KES 20.00Bn, signaling weak investor uptake. The total amount of accepted bids stood at KES 1.75Bn, of which KES 1.22Bn were competitive bids and KES 0.53Bn non-competitive bids. The weighted average rate of accepted bids came in at 11.9662%, below the market weighted average rate of 12.3179%, suggesting cautious pricing by investors.
- **Across the secondary bond market, the value of bonds traded decreased 23.6% w/w to KES 40.67 Bn** from **KES 53.21 Bn** recorded a week prior. The NSE Bond Index witnessed a decrease of 46 bps w/w to 1,164.74 points, driven largely by an increase in the 11-year benchmark yields. The 11-year yield rose the most by 64.08 bps w/w, while the 7-year yield eased the most by 1.43 bps w/w.
- **Yields on Kenya's Eurobond papers decreased by an average of 19.35 bps w/w,** supported by easing geopolitical tensions.

Table 1: Indicative Fixed Income Stats

Rate	Current	Previous	w/w bps change	2026 bps change
91- Day	7.42%	7.40%	2.41	(30.40)

Macroeconomic Developments

Exchange Rate

- The Kenya Shilling appreciated against the USD, closing the week at KES 129.11 from KES 129.15 the previous week, a marginal w/w appreciation of 0.1%. The Shilling's YTD depreciation against the USD stood at **0.04%.**
- Official forex reserves decreased by **0.1% w/w** to **USD 13,306 Mn** from **USD 13,316 Mn**. The current reserves now offer about **5.6 months** of import cover, meeting the CBK's statutory requirement of 4 months. The reserves also met the EAC's convergence requirement of 4.5 months of import cover.

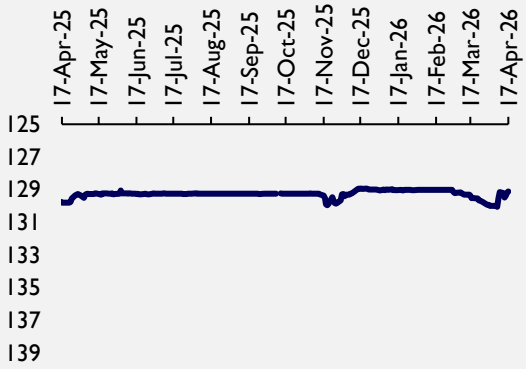

Liquidity

- The Kenya Shilling Overnight Interbank Average (KESONIA) closed the week at 8.76%. We expect KESONIA to remain broadly aligned with the CBR, supported by adequate liquidity in the interbank market and CBK's active liquidity management.

EPRA Pump Price Review – April 2026

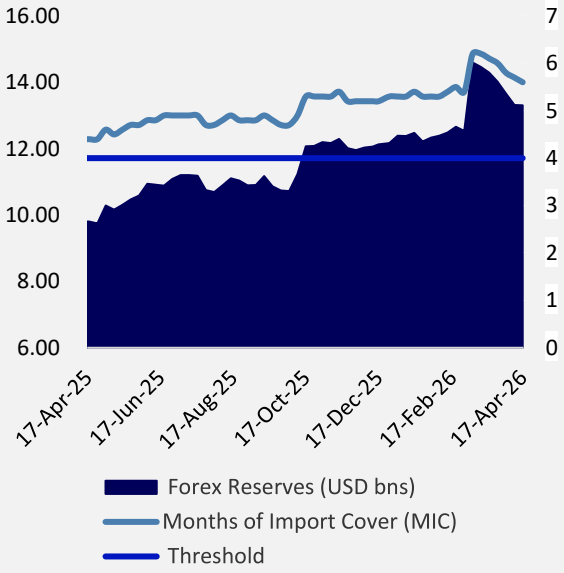

- The Energy & Petroleum Regulatory Authority (EPRA) released the maximum retail pump prices for the period 15th April 2026 to 14th May 2026, with prices initially reflecting upward pressure before a downward adjustment following fiscal intervention.
- In Nairobi, pump prices were revised downwards following a reduction in VAT from 13% to 8%, with Super Petrol and Diesel declining to KES 197.60 and KES 196.63 per litre, respectively, while Kerosene remained unchanged at KES 152.78 per litre.
- The initial upward pressure on prices was driven by a sharp increase in international oil costs, with Super Petrol, Diesel and Kerosene recording significant rises in landed costs during the review period, reflecting tightening global supply conditions and elevated geopolitical risk premiums.
- The pricing framework incorporated cargoes procured earlier in the cycle, implying that the full impact of escalating geopolitical tensions particularly in the Middle East was only partially reflected in this review, suggesting latent upward pressure in subsequent cycles.
- The government's intervention through a VAT reduction and continued use of price stabilization mechanisms played a critical role in cushioning consumers, effectively offsetting the pass-through of higher global oil prices and limiting the extent of retail price increases.
- While the near-term trajectory of pump prices may remain relatively contained due to policy support and stabilization measures, risks remain tilted to the upside. Persistent geopolitical tensions and potential supply disruptions could exert renewed pressure on landed costs, increasing the likelihood of upward adjustments in the coming pricing cycles.
